Extending Water Mains.

Recently a petition was filed with the city council asking for the laying of a water main on Twenty-third street from B to F street and the matter went to the fire and water committee. Property owners on Twenty-third street, between A and B streets, were left out in the cold in this petition and it is now proposed to amend the new petition so as to include the territory from A to F street. Quite a number of houses are being built on Twentythird street at present and city water service is desired. It is hardly probable that there will be any objection to the amending of the petition so as to include one more block, as the expense to the city will not be increased. By the laying of this new main fire hydrants will most likely be located at D and F streets. A hydrant is already placed at B street, the main from this coming down from Twenty-fourth street. By granting this request the city will assume an additional burden for water of \$120 a year, but this sum is exceedingly small when compared with the expensive buildings being erected on North Twenty
